Front End Developer

SUMMARY

Specialization in front-end web development. Clean and efficient HTML and CSS within cross-browser platforms.

Creatively producing clean-coded web sites with an innovative, customer service base approach for over 7 years.

EMPLOYMENT

March 2013 - Present - Front End Developer
Pure Red - Stone Mountain, Georgia
Working as the Lead Developer for Dollar General in creating key componets for the Dollar General website and working at a high efficiency rate with quick turnarounds to keep the Dollar General site fresh and new with daily/weekly campaigns. Creating new landing pages, maintaining weekly slider ads & developing new features using my knowledge of HTML, CSS, JavaScript, jQuery; developing weekly email blast for several clients while using the best practices with proper standards.

February 2008 - March 2013- Web Developer
PM Systems/ACI Worldwide - Chapin, South Carolina
I worked as a pivotal member within an organization that focuses on the design and maintenance of credit union portals. With clients from Hawaii to Texas, I provided the highest quality customer service in helping our customers become more knowledgeable on product features offered. As a member of the FI Design team, I mentored the team to utilize CSS and HTML standards to implement a more marketable approach for our clients. Since joining ACI, I have helped the company implement more diverse design to make clients stand out and maximize usability for the members of the credit unions.

April 2007 - February 2008 - Web Designer/Developer
Campaign Mojo - Roswell, Georgia
As a core member of the development team, I provided feedback to the programmers on our internal CMS application. I helped design the front end interface using XHTML and CSS, following the W3C standards to meet the clients' visual expectations for the application.
